- » Copies of incomplete medical records will not be released for purposes other than continued patient care.
- » Copies <u>cannot</u> be faxed to a private residence. They can only be faxed to the place of business of another health care provider.
- » There May be charge if source document is paper for releases of PHI for all reasons other than continued patient care.
- » In accordance with NRS 629.061.1, the following is the practice policy for requesting medical records for a deceased patient:
 - 1. When requesting medical records for a deceased patient, one of the following must be presented:

<u>Handwritten will</u> – A handwritten will is valid in Nevada if there is a sole beneficiary and it is signed and dated by the decedent. No witness or notary signature/stamp is required. It is assumed (and accepted) that the sole beneficiary is Executor. A non-interested third party must sign an affidavit stating that the signature of the decedent is authentic.

<u>Regular will</u> – This must state that the decedent was in sound mind, over 18 and not under duress at the time of the will's creating. It must be witnessed by two other people and notarized to be "self-proving" (i.e. valid).

<u>Special Letter of Administration</u> – A special letter of administration can be issued by Probate specifically to authorize an individual to obtain the medical record of the decedent provided that there are no assets in the estate. This process has no cost and takes two days.

<u>Probate</u>: If there is no valid will, the petitioner must request a hearing with Probate to be named Executor. It generally takes 2-3 weeks from the time of the application to the actual hearing. You must contact the office of the Probate Court for additional information.

When applicable, appropriate Power Of Attorney or Probate documentation must accompany the Authorization.
- Indicate by checking the appropriate box whether the PHI is to be mailed, picked up from our office or faxed.
